PROFESSIONAL SUMMARY

Software Developer specialized in Node.js and the JavaScript ecosystem, with experience combining product development, enterprise integrations, and leading my own projects in the FiveM/online gaming ecosystem. Solid knowledge of SQL, REST APIs, WebSockets, process automation, and agentic coding workflows. Additional experience with Ruby on Rails in corporate environments, working on the operations side of a people management platform.

PROFESSIONAL EXPERIENCE

Founder — FiveLabs

February 2026 – Present

Agency dedicated to creating and managing servers for online gaming communities, currently expanding into servers in other countries.

- Founded and lead FiveLabs, driving its expansion into servers in other countries in addition to UruguayRP.
- Manage and develop UruguayRP, a FiveM roleplay server with 18K+ followers on Instagram, 7K+ on TikTok, and millions of views.
- Apply agentic coding (Claude Code / Cowork) in the development workflow, shortening delivery and maintenance times.

Stack: Lua, Node.js, MariaDB, Cloudflare (R2, Tunnels & WebRTC TURN).

Co-Founder & Software Engineer — Peakly SA

September 2023 – April 2026

Full-time development and operation of a SaaS platform for the FiveM ecosystem, with a recurring international customer base. Project discontinued in April 2026 due to platform changes.

- Designed and implemented the full architecture of the SaaS product in Node.js and React, including backend, frontend, customer portal, and back offices.
- Ran the project autonomously: product development, international technical support in English, and iteration based on customer feedback.

Stack: Node.js, Express, WebSockets, React, SQL, Lua.

Integration Analyst — Buk

November 2024 – July 2025

SaaS company for people management and payroll, operating in multiple LATAM countries.

- Developed custom accounting integrations for enterprise clients, generating accounting files tailored to each company's financial structure.
- Joined the team migrating historical payslips for large-scale enterprise clients, processing millions of records per client and ensuring validation, consistency, and integrity in critical processes.
- Designed and structured bank layouts that met the formats required by financial institutions in the region, ensuring accuracy, compatibility, and standards compliance.
- Implemented bonuses with custom business logic, integrated into the platform's payslip calculation engine.

Stack: Ruby on Rails, PostgreSQL, SQL Server, C#.

Professional Internship — Black Nexus AI

January 2024 – April 2024

Tech startup focused on SaaS solutions for retail.

- Led the backend team in developing a multi-tenant point-of-sale SaaS system.
- Designed and implemented REST APIs and data models to support the system's operations.
- Tackled scalability challenges and designed an architecture adaptable to different business verticals.

Stack: Python, Django REST Framework, PostgreSQL.

Freelance Developer

January 2020 – December 2023

Software solutions for clients on the FiveM platform.

- Designed and implemented backend solutions for systems with many concurrent users and high load.
- Developed complex business logic and integrations with relational databases.
- Applied development best practices, achieving performance improvements of up to 50% in systems delivered to clients, measured with profiling tools (resource monitor).

Stack: Lua, JavaScript, SQL, HTML, CSS.

TECHNICAL SKILLS

Backend: Node.js, Express, SQL, REST APIs, WebSockets, JavaScript, Lua, Ruby on Rails, Python, Django REST Framework, Laravel, C#.

Frontend: React, JavaScript, HTML, CSS.

Other: Enterprise accounting systems, bank layouts, REST APIs, WebSockets, multi-tenant architecture, Git, agile methodologies.

EDUCATION

Associate Degree in Computer Science (Técnico Universitario en Informática)

March 2023 – December 2024

Universidad Técnica Federico Santa María (UTFSM), Chile.

Coursework focused on software development, database modeling, object-oriented programming, and web development.
